WEEK 3 Project :

1. Creating a Bulk Files :

## In [1]: **for** i **in** range(1,101):

name = 'nandysfile/Nandhini Kumar file no\_' + str(i) +'.txt' fd = open(name, 'w') fd.write("This is Bulk file no\_" + str(i)) fd.close()

2. Reading data from a file:

print(fd.read())

fd.close()

This is Bulk file no\_54

In [2]: | fd = open('nandysfile/Nandhini Kumar file no\_54.txt','r')

3. Reading Data from Bulk Files - Using file names Loop: data = []
